About this Webinar:

Looking for an efficient and effective model to enhance person-centered care? Join us for an engaging webinar exploring how Beth Israel Lahey Health- Exeter Hospital in NH successfully implemented the TeamBirth model to elevate person-centered care in maternity services. In this session discover:

- Core components of the TeamBirth model and its role in promoting person-centered care during childbirth.
- How structured huddles and prioritizing the patient voice as part of the care team enhance communication between patients, families, and clinical teams.
- Key challenges and successes experienced during the implementation of TeamBirth.
- Insight into how TeamBirth's core principles can be applied beyond maternity care to improve communication, collaboration, and the patient experience in various clinical settings.
